

VW_BUSINESS_ANALYTICS_EDA_REPORT

Overview

`VW_BUSINESS_ANALYTICS_EDA_REPORT` is a consolidated exploratory data analysis (EDA) view that provides a high-level summary of key business performance metrics across multiple functional domains. It combines essential KPIs from various analytical views into a single reporting dataset, enabling quick assessment of overall business health.

Each row in the view represents a single business metric along with its calculated value, business domain, and descriptive explanation.

Purpose

The purpose of this view is to provide a lightweight executive summary of the most important business KPIs for exploratory analysis and operational monitoring.

Rather than querying multiple analytical views individually, users can retrieve the most critical metrics from a single unified view.

Output Structure

Column	Description
METRIC_NAME	Name of the business metric
METRIC_VALUE	Calculated KPI value
DOMAIN	Business area to which the metric belongs
DESCRIPTION	Brief explanation of the metric

Business Domains

1. Sales & Revenue

Provides an overview of overall revenue performance and customer purchasing behavior.

Metrics

- Top Products Revenue
- Monthly Revenue
- Average Order Value

Business Objective

- Monitor overall sales performance
 - Evaluate product revenue contribution
 - Measure average customer spending per order
-

2. Customer Analytics

Provides key insights into customer value and retention.

Metrics

- Top Customers
- Repeat Purchase Rate
- Customer Churn

Business Objective

- Identify high-value customers
 - Measure customer loyalty
 - Monitor customer retention and inactivity
-

3. Orders & Fulfillment

Measures operational performance of the order fulfillment process.

Metrics

- Order Cancellation Count
- Late Deliveries

Business Objective

- Track cancelled orders
 - Monitor delivery performance
 - Identify fulfillment bottlenecks
-

4. Inventory & Suppliers

Provides inventory health indicators.

Metrics

- Out of Stock Products
- High Margin Products

Business Objective

- Identify inventory shortages
 - Monitor profitable products
 - Support inventory planning decisions
-

5. Finance & Risk

Measures financial performance and operational risk.

Metrics

- Payment Success Rate
- Fraud Flags

Business Objective

- Evaluate payment reliability
 - Detect potentially fraudulent transactions
 - Monitor financial risk indicators
-

Source Analytics Views

The report is built using the following analytical views:

Sales & Revenue

- VW_TOP_PRODUCTS_ANALYTICS
- VW_MONTHLY_REVENUE_ANALYTICS
- VW_AVG_ORDER_VALUE_ANALYTICS

Customer Analytics

- VW_TOP_CUSTOMERS_ANALYTICS
- VW_REPEAT_PURCHASE_RATE_ANALYTICS
- VW_CUSTOMER_CHURN_ANALYTICS

Orders & Fulfillment

- VW_ORDER_CANCELLATION_ANALYTICS
- VW_LATE_DELIVERIES_ANALYTICS

Inventory & Suppliers

- VW_OUT_OF_STOCK_PRODUCTS_ANALYTICS
- VW_HIGH_MARGIN_PRODUCTS_ANALYTICS

Finance & Risk

- VW_PAYMENT_SUCCESS_RATE_ANALYTICS
 - VW_FRAUD_DETECTION_ANALYTICS
-

Design Characteristics

- Executive-level EDA reporting view
 - One KPI per row using `UNION ALL`
 - Domain-based organization of business metrics
 - Aggregates metrics from multiple analytical views
 - Lightweight and easy to query
 - Reusable data source for dashboards and business reports
 - Simplifies KPI monitoring by centralizing key metrics
-

Typical Use Cases

- Exploratory Data Analysis (EDA)
 - Executive KPI dashboards
 - Business health monitoring
 - Monthly business reviews
 - Operational performance tracking
 - Business intelligence reporting
 - Quick executive summaries
-

Benefits

- Centralizes essential business KPIs in a single view
 - Simplifies reporting and dashboard development
 - Reduces the need to query multiple analytical views
 - Provides consistent KPI definitions
 - Supports rapid business performance assessment
 - Improves reporting efficiency and maintainability
-

Conclusion

`VW_BUSINESS_ANALYTICS_EDA_REPORT` provides a concise, unified view of the organization's most important business metrics across Sales, Customers, Operations, Inventory, and Finance. It serves as a foundational exploratory reporting layer, enabling analysts and decision-makers to quickly evaluate business performance and identify areas requiring further investigation.
